

OPEN REAL-TIME COLLABORATION

Collaboration without boundaries.

ProtoWave is a modern, open fork of Apache Wave — living shared spaces where distance and language melt away. Think, write, and build together, in real time.

THE MARK

A mesh wave, cut like crystal

The mark is a low-poly wave surface — a triangulated mesh that catches light like faceted glass. It reads as motion and structure at once: fluid collaboration, held together by shared form.

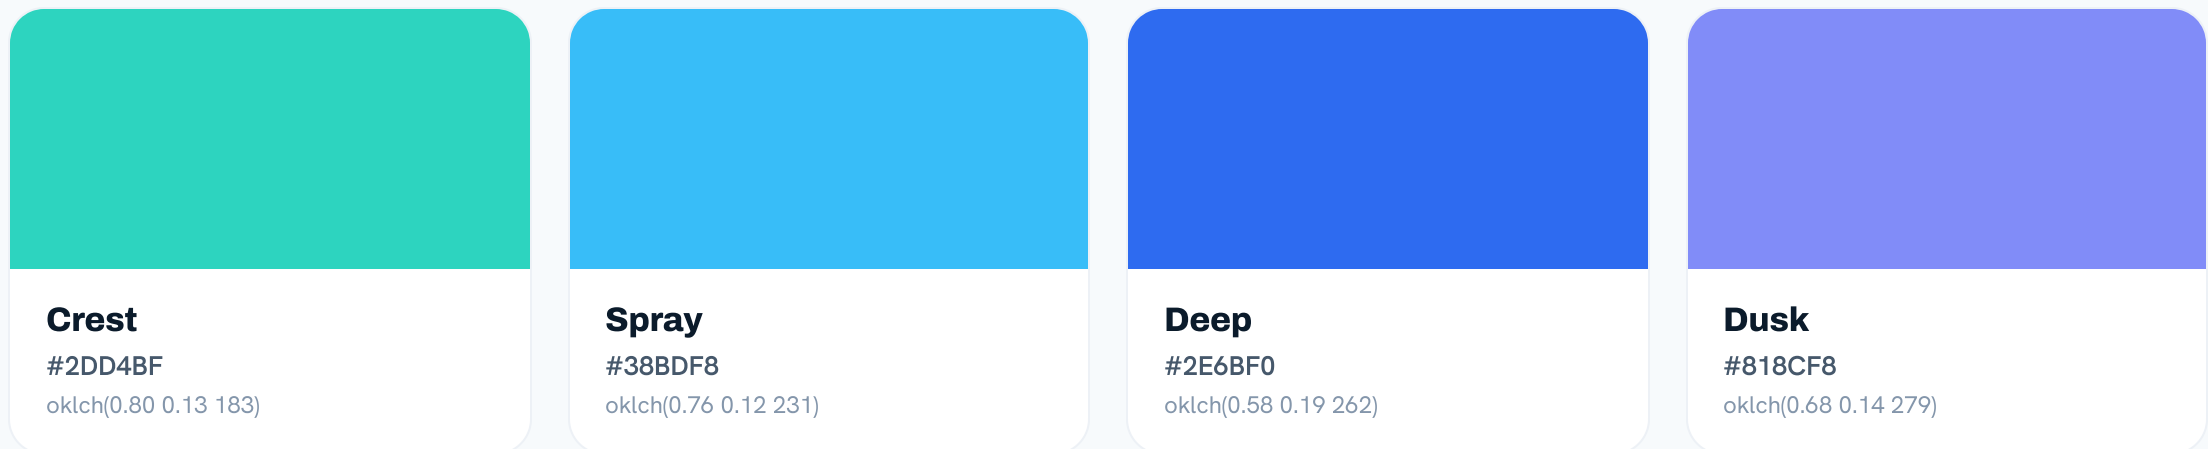

PALETTE

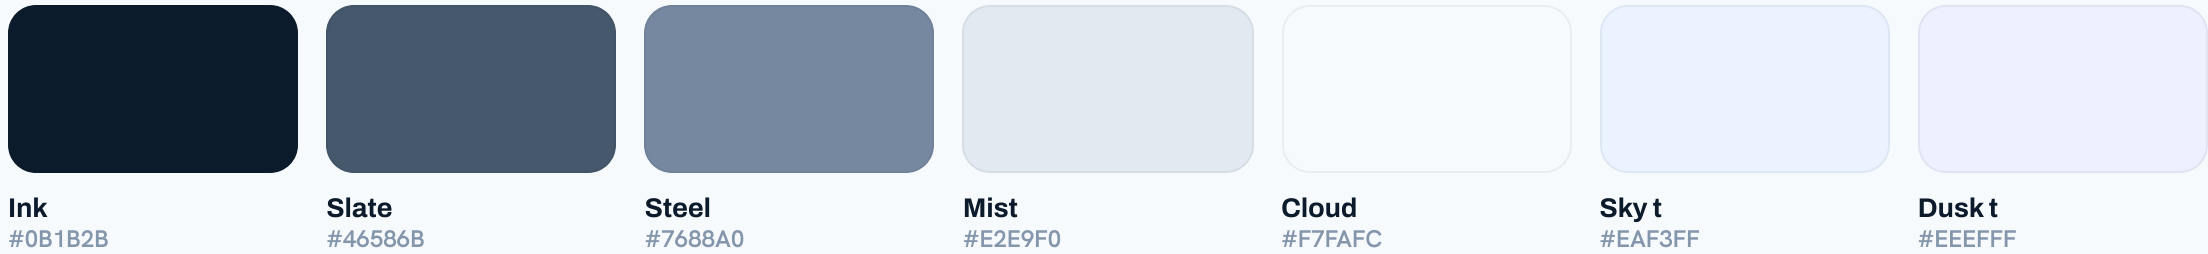

Cool, calm, luminous blues

Four brand blues run crest to dusk, tuned to the same lightness and chroma so they sit in harmony. Deep ink and cool neutrals keep everything legible and airy.

BRAND

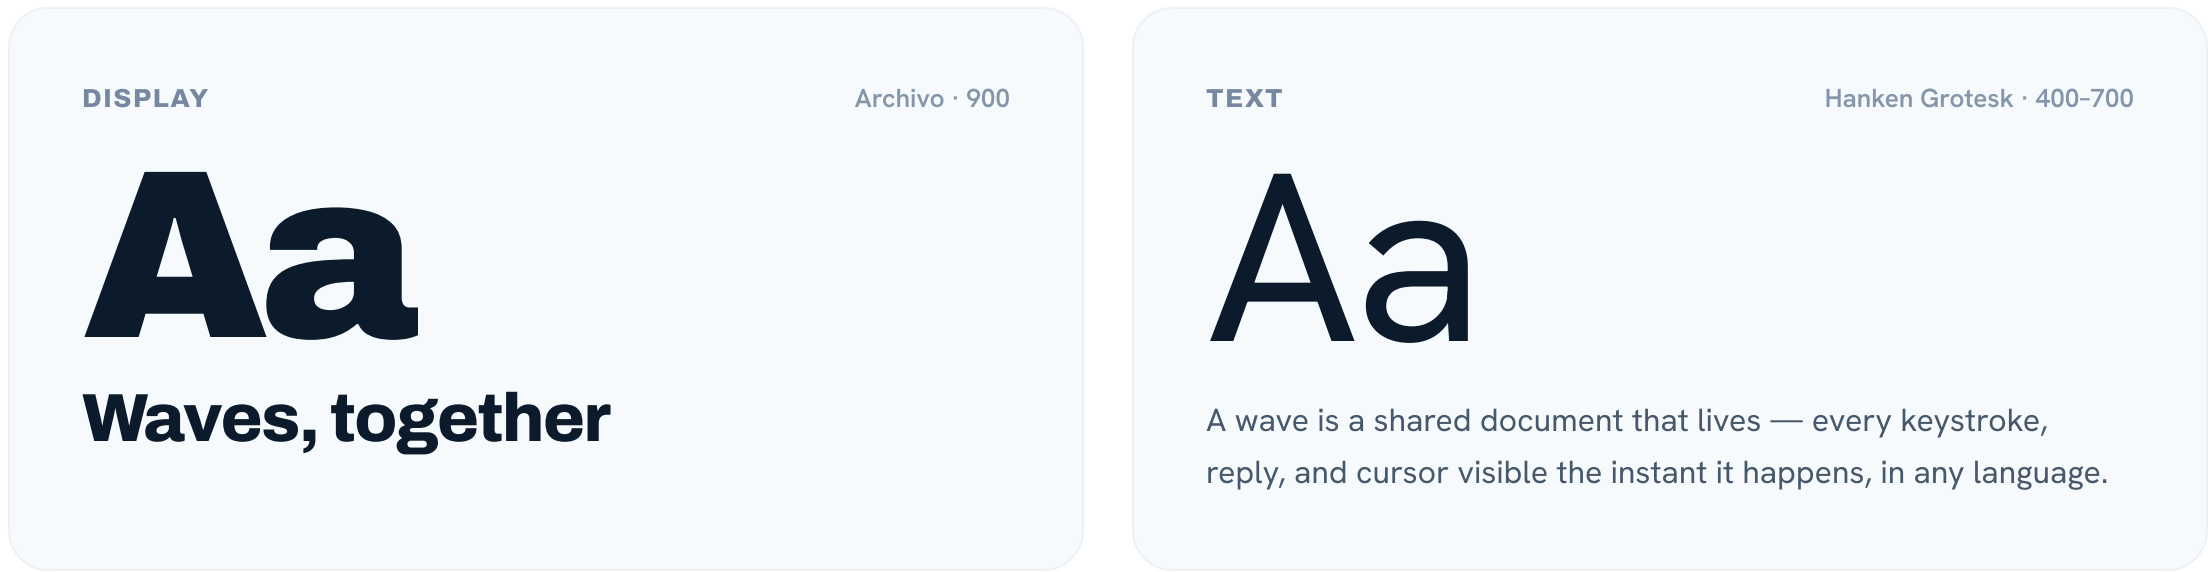

NEUTRALS & TINTS

TYPOGRAPHY

Bold headlines, quiet body

Archivo in its heaviest weights carries the display voice — dense, modern, confident. Hanken Grotesk handles everything you read, with an easy, humane rhythm.

Display · 900 · -4%	Collaboration
Heading · 800 · -2.5%	Real-time waves
Subhead · 700	Shared, living documents
Body · 400	Think, write and build together, live.
Caption · 600	APACHE-2.0 · SELF-HOSTABLE · FEDERATED

COMPONENTS

The building blocks

Soft surfaces, generous radii, and one confident blue for action. Everything is quiet until it needs your attention.
